

Resume 1 — Strong Match Candidate

Rohan Iyer

Bangalore, India

rohan.iyer@example.com

Professional Summary

Backend infrastructure engineer with 5 years of experience building distributed systems, event-driven architectures, and scalable APIs for high-growth startups.

Experience

Senior Backend Engineer — CloudMesh AI

2022 – Present

- Built Kafka-based streaming systems processing 50M+ events/day.
- Designed distributed backend services using Python and FastAPI.
- Managed Kubernetes deployments on AWS EKS.
- Implemented observability stack using Prometheus and Grafana.
- Optimized PostgreSQL and Redis infrastructure under production scale.

Software Engineer — InfraScale Labs

2020 – 2022

- Developed microservices in Go for internal AI infrastructure tooling.
- Built CI/CD workflows and Docker deployment pipelines.
- Worked with ML engineers to productionize inference APIs.

Projects

- Open-source Kubernetes monitoring plugin.
- Real-time distributed log processing platform using Kafka.

Skills

Python, Go, Kafka, Kubernetes, Docker, PostgreSQL, Redis, AWS, FastAPI, Distributed Systems, Grafana, Prometheus, CI/CD
