

Vivaan Reddy

Frontend Engineer | Full-stack development

Software engineer with 6.6 years of experience across web, backend, and cloud systems. Strong fundamentals in software development and system design. My background is full-stack, but my comfort zone is the backend and the database. I've been keeping up with AI/ML at a self-learner level — taken some online courses, played with the OpenAI and Anthropic APIs, built a small RAG side project — but I haven't done it in a professional capacity yet. Open to roles where I can either deepen my software engineering work or, if the team is open to it, start contributing to ML-adjacent systems.

Experience:

Frontend Engineer at Acme Corp

2023-09-10 to None

Test automation and QA engineering for a fintech product. Built and maintained the end-to-end test suite using Selenium and pytest, plus the load-testing setup using Locust. Worked closely with developers on testing patterns and with product on acceptance criteria. Recent work has been on shifting test responsibility into the dev team — moving from QA-as-gate to QA-as-coach. Career has been entirely in QA/test engineering.

Frontend Engineer at Pied Piper

2021-01-23 to 2023-09-10

Test automation and QA engineering for a fintech product. Built and maintained the end-to-end test suite using Selenium and pytest, plus the load-testing setup using Locust. Worked closely with developers on testing patterns and with product on acceptance criteria. Recent work has been on shifting test responsibility into the dev team — moving from QA-as-gate to QA-as-coach. Career has been entirely in QA/test engineering.

Full Stack Developer at Initech

2019-12-30 to 2021-01-23

Android mobile development using Java and (more recently) Kotlin at a consumer-app company. Built and maintained multiple production features including the main shopping flow, push notification system, and the offline-first sync layer. Comfortable with the Android framework, Jetpack components, and the typical patterns (MVVM, Hilt, Coroutines). My career has been entirely on mobile so far; interested in expanding into broader backend or platform engineering.

Skills:

CNN, Java, Accounting, Data Pipelines, Node.js, Tailwind
