

Pranav Agarwal

.NET Developer | Full-stack development

Software engineer with 8.1 years of experience across web, backend, and cloud systems. Strong fundamentals in software development and system design. Most of my work is conventional backend engineering — APIs, databases, queues, deployments. I've been keeping up with AI/ML at a self-learner level — taken some online courses, played with the OpenAI and Anthropic APIs, built a small RAG side project — but I haven't done it professionally yet. Open to roles where I can either deepen my software engineering work or, if the opportunity is open to it, start contributing to ML-adjacent systems.

Experience:

.NET Developer at Cognizant

2024-02-07 to None

Java backend development at a large enterprise — Spring Boot microservices, Kafka for inter-service messaging, Postgres + Redis for storage. Worked on the customer onboarding flow which involved orchestrating multiple downstream services. Solid on the Spring ecosystem, transaction handling, and the operational side of Java services. Looking to either go deeper on distributed systems or expand into modern application stacks.

Cloud Engineer at HCL

2021-11-19 to 2024-02-07

Test automation and QA engineering for a fintech product. Built and maintained the end-to-end test suite using Selenium and pytest, plus the load-testing setup using Locust. Worked closely with developers on testing patterns and with product on acceptance criteria. Recent work has been on shifting test responsibility into the dev team — moving from QA-as-gate to QA-as-coach. Career has been entirely in QA/test engineering.

Mobile Developer at Globex Inc

2018-07-24 to 2021-11-05

Full-stack web application development at a SaaS company. Built React-based admin interfaces and the REST API backing them. Worked across the stack: frontend components, REST endpoint design, Postgres schema, deployment via Docker/Kubernetes. Comfortable in most parts of a typical web stack though my comfort zone is the backend and database side. Recent learning has been on the testing and CI/CD discipline.

Skills:

Speech Recognition, Project Management, REST APIs, CSS, Embeddings, Hadoop, Spark, Python, Data Pipelines, OpenCV
